	Copper (Cu)	Aluminum (Al)
<p>Description: Record descriptions of each cube. How are they similar? How are they different? Which do you think has more mass? Why?</p>		
<p>Mass: Using a balance, measure the mass of each cube. Record the masses and circle the greater mass.</p>		
<p>Volume: Measure one edge of each cube and calculate its volume in <math>\text{cm}^3</math>. Record the volumes and circle the greater volume.</p>		
<p>Density: Determine and record the density of each cube. Divide the mass of the cube by the volume of that cube.</p>
